### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael Dixon, Attorney of Record, on January 3, 2005.

The application has been amended as follows:

In the Claims:

In claim 7, line 3, "a" has been changed to -- the --.

In claim 8, line 1, "sealing system" has been changed to -- turbine engine --.

In claim 9, line 1, "sealing system" has been changed to -- turbine engine --.

In claim 11, line 1, -- the -- has been inserted after "wherein".

Claim 13 is canceled.

The claims have been amended as follows:

Art Unit: 3745

-- 2. (Currently Amended) The turbine engine of claim 5, further comprising at least one protrusion extending from the stationary shroud toward the ~~turbine blade assembly~~ at least one shrouded turbine blade --.

-- 3. (Currently Amended) The turbine engine of claim 2, wherein at least one protrusion extends circumferentially about an axis of rotation of the ~~turbine blade assembly~~ at least one shrouded turbine blade --.

-- 4. (Currently Amended) The turbine engine of claim 2, wherein the at least one seal land comprises at least a first seal land and a second seal land, wherein the first seal land is positioned on the at least one shrouded turbine blade upstream of the at least one protrusion extending from the stationary shroud, and the second seal land is positioned on the at least one shrouded turbine blade downstream of the at least one protrusion extending from the stationary shroud. --

-- 5. (Currently Amended) A turbine engine having a sealing system for reducing a gap between a tip of a shrouded turbine blade and a stationary shroud of a the turbine engine, comprising:

at least one shrouded turbine blade;

at least one seal land coupled to at least one shrouded turbine blade, the at least one seal land extending from a tip of the at least one shrouded turbine blade toward the stationary shroud of the turbine engine and having a curved configuration;

Art Unit: 3745

wherein the at least one seal land is adapted to straighten from a curved resting position to an operating position where a tip of the at least one seal land is closer to the stationary shroud of the turbine engine than when the turbine engine is in a resting position;  
and

wherein the at least one seal land is attached to the at least one shrouded turbine blade by sliding the at least one seal land into a slot in the tip of the at least one shrouded turbine blade. --

-- 6. (Currently Amended) The turbine engine of claim 5, wherein the at least one seal land is brazed to the tip of the at least one shrouded turbine blade. --

-- 12. (Currently Amended) The turbine engine of claim 18, wherein the at least one seal land comprises at least a first seal land and a second seal land, wherein the first seal land is positioned on the at least one shrouded turbine blade upstream of the at least one protrusion extending from the stationary shroud, and the second seal land is positioned on the at least one shrouded turbine blade downstream of the at least one protrusion extending from the stationary shroud. --

-- 14. (Currently Amended) The turbine engine of claim 7, wherein the at least one seal land is brazed to the tip of the at least one shrouded turbine blade. --

Art Unit: 3745

-- 18. (Currently Amended) The ~~sealing-system~~ turbine engine of claim 7, further comprising at least one protrusion extending from the stationary shroud toward the at least one shrouded turbine blade. --

Claim 13 has been cancelled because it is a duplicate of claim 15. The other above changes to the claims have been made to improve the clarity and precision of the claims. It is noted that during the interview conducted on January 3, 2005, the examiner indicated that form PTO-1449 was not located in the electronic file of this application, and that the examiner would attach a form PTO-892 citing the reference cited by Applicant on form PTO-1449.
